PROFESSIONAL SUMMARY

Computer Science graduate with internship and project experience in full-stack and mobile application development, QA testing, and AI-enabled systems. Built practical web and mobile solutions using React, Ionic Angular, Flutter, Firebase, MongoDB, and REST APIs. Strong in debugging, testing, and developing user-focused applications that improve workflow efficiency and system usability.

EXPERIENCE

Bids and Awards Committee (BAC) Office Intern

Cagayan State University - Andrews Campus

January 2026 - February 2026

- Developed BACSystem, a solo pre-verification platform for procurement documents and PPMP management using React Native and Firebase, streamlining document validation and organization workflows.
- Organized and managed PPMP documents to improve accessibility and reduce manual processing time within the office.
- Provided technical support and resolved software and system issues to maintain smooth daily operations and minimize technical disruptions.

QA, Application and Website Development Intern

Comptrolla | Quezon City

December 2025

- Supported the development team in testing and improving ongoing software applications, contributing to more stable and efficient system performance.
- Performed QA testing to identify bugs, usability issues, and system inconsistencies, helping improve application reliability and user experience.
- Collaborated with developers and team members to support application enhancements, validate fixes, and contribute to faster issue resolution and smoother deployment workflows.

PROJECTS

MuniciFix | A mobile-based platform for municipal issue reporting and resolution with integrated K-Means Clustering.

- Led the development of a mobile-based municipal issue reporting and resolution platform using Ionic Angular, JavaScript, REST APIs, and Cloudinary.
- Integrated K-Means Clustering and Tesseract OCR to improve issue categorization, automate report verification, and enhance analysis of municipal concerns.
- Reduced manual issue validation efforts by automating concern classification and text verification processes.
- Improved issue tracking and response coordination by centralizing citizen reports into a single digital platform.

BACSystem | A Pre-Verification platform for Procurement documents and PPMP Management

- Designed and developed a pre-verification platform for procurement documents and PPMP management using React Native, JavaScript, and Firebase.
- Independently built the platform as the official BAC Office project during on-the-job training.
- Reduced manual document checking and verification workload by digitizing procurement validation and PPMP management processes.

StudyLense | An Ai for monitoring academic engagement and distractions in learning spaces.

- Developed an AI-based system for monitoring academic engagement and identifying distractions in learning environments using Python and machine learning techniques.
- Trained and tested models for engagement and distraction detection to improve monitoring accuracy and behavioral analysis.
- Collaborated with the team to design system features, AI workflows, and application functionality for a Computer Science elective and Artificial Intelligence final project.

TECHNICAL SKILLS

- **Languages:** Java, Python, C++, SQL, JavaScript, HTML/CSS, PHP, TypeScript, C#
- **Frameworks & Libraries:** React, Node.js, Ionic Angular, Flutter, React Native
- **Database & Cloud:** Firebase, MongoDB, Cloudinary
- **Developer Tools:** Git, GitHub, Vs Code, XAMPP, Rest APIs

EDUCATION

Cagayan State University – Carig Campus | Tuguegarao City, Cagayan

Bachelor of Science in Computer Science

September 2022 – May 2026

Academic Distinction | Dean's Lister for 8 consecutive semesters | Service Award | GWA: 92.46
